Applications:

- Short-term to long-term interior-mount window graphics for retail and commercial signage, design and architectural applications, glass doors and transparent surfaces.
 - Apply to clean glass surface
 - Use mild soap and water to rinse glass
 - Remove liner by peeling at 90°
- Application on non-glass transparent surfaces such as (but not limited to) polycarbonate or PMAA is not recommended.

In order to create a One Way effect:

- Print mirror image with colour sequence printed in reverse
- Print an opaque white coat over entire film
- Print an opaque black coat over the entire film

KEY BENEFITS

- Dimensional Stability: Excellent
- Humidity Resistance: Excellent
- Solvent resistance: Excellent
- Very easy to install and remove
- Clear Universal liner allows easy side to side application
- The 67/33 perforation pattern is specifically designed to provide a strong visual impact.
- The excellent cohesion of the adhesive allows a clean removability up to 12 months. Low/high temperatures and solvent based inks may impact the clean removability of the film.
- Compatible with eco-solvent, latex and UV-cure inks;
 - Print image on PVC side, not on release liner
 - Always test your printing/ink combination prior to commercial use.
 - Product can be cut and weeded (check compatibility with your equipment).

TECHNICAL INFORMATION

 1 if stored on vertical position (AA Zone 1)

• Guidelines:

With a 4 colour print+ White + black, we recommend a minimum of 24 hours between printing and application of the film. Darker prints may require longer.

Low/high temperatures and solvent based inks may impact the clean removability of the film.

Do not apply on rubber seals around the window
